Re: Job Well Done

Gene:

I wanted to take this opportunity to commend you and your staff with a job well done this past year and 1/2.

The Ziios card processing integration with the Motor Cycle Industry Council has been an outstanding addition to our dealership. While we are saving approximately \$ 3,600.00 per year from our previous processor, for us, the relationship is much more - First Pay cares about us and have resolved a couple of issues that arose last year.

I just make a call; staff and you get the job done with any issues we have with processing credit/debit cards. As you know, I'm really fussy about integration of any system and find it clean and well done. It saves us huge amounts of time and effort.

It's also good to know the MIC gets a portion of each sale that is used to make the industry grow.

My old processor just cared about making money off our industry.

Not often can you find an opportunity that saves money, streamlines your business, and supports industry growth all in one - but Ziios did just that - with this integration.

Regards,

Steve Kuehl, General Manager
Beach Yamaha, Inc.
